DETAILED DESCRIPTION

Please replace the Abstract on page 21 with the following new Abstract:

A radar transceiver includes one or more electronic components and a substrate with a multilayer structure and integrated circuit elements. The electronic components are arranged on a top surface of the substrate. The electronic components include at least one active or nonlinear circuit component of a mixer and at least one active or nonlinear circuit component of an oscillator. The integrated circuit elements include a passive circuit component ring of the mixer and a resonant circuit of the oscillator.
